

**ABSORBENT GARMENT AND METHOD FOR PLACING
AN ABSORBENT GARMENT ON A WEARER'S WAIST**

ABSTRACT OF THE DISCLOSURE

5 An absorbent garment for wear about a wearer's waist
includes a waist belt, a garment shell and an absorbent
assembly constructed to take in and retain body exudates
released by the wearer. The absorbent assembly is releasably
attached generally at front and back waist regions thereof to
10 the waist belt. The garment shell is attached generally at
front and back waist regions thereof to the waist belt, with
the absorbent assembly generally disposed within the garment
shell, whereby the front waist region of the garment shell is
in opposed relationship with the front waist region of the
15 absorbent assembly and the back waist region of the garment
shell is in opposed relationship with the back waist region
of the absorbent assembly.
